## INTRODUCTION

The intent of this directory is to list all those companies (other than oil and gas operators) that are involved in mining, processing and manufacturing mineral products (see table 1, Mineral Product Codes) in Illinois. Detailed information on crude oil and natural gas producers in Illinois can be found in the Illinois Oil and Gas Association's "Tri-State Oil Men's Directory (Illinois, Indiana, Kentucky)," (13 Main Street, Mount Vernon, IL 62864) and the Illinois State Geological Survey's Monthly Report of Oil and Gas Drilling in Illinois.

Information about operations listed has been gathered from the U.S. Bureau of Mines; Illinois Manufacturers Directory; Illinois Department of Transportation (IDOT); and from staff members of the Illinois State Geological Survey, including Richard D. Harvey, Jonathan H. Goodwin, Donald G. Mikulic, Russell J. Jacobson, James W. Baxter, Dennis R. Kolata, and Patricia Helm.

The directory is divided into sections by mineral product, then alphabetically by county, then by company within each county. For each entry in the directory:

- The "remarks" line contains information on the types of mineral products that may be available.
- The "rock units" line identifies the geologic materials mined in Illinois (see Stratigraphic Units Mined). It does not apply to mineral processing or manufacturing plants.

In the sand and gravel and stone sections the six digit numbers below the county name are derived from the IDOT, Division of Highways, Bulletin No. 23, "Sources and Producers of Aggregates for Highway Construction in Illinois" (revised February 13, 1986). The Producer/Supplier code numbers are defined as follows: a) the first three numbers are the unique county numbers, b) the fourth number identifies the aggregate sources as sand and gravel pits (0), or crushed stone quarries (2), and c) the last two numbers relate operations within each county to pit locations (figure 1), or to quarry locations (figure 2).

For example:

- a) 201 - 023
- 
- Identifies the pit in the county
- Sand and gravel pit (fig. 1)
- Winnebago County
- b) 201 - 223
- 
- Identifies the quarry in the county
- Stone quarry (fig. 2)
- Winnebago County

The term "quarry" is used in the stone section to designate those aggregate sources where bedrock formations consisting of limestone, dolomite and one each of chert and sandstone must be drilled and blasted before the rock can be crushed and sized into various products. The term "pit" is used in the sand and gravel section to designate those aggregate sources where essentially unconsolidated deposits of sand and gravel with lesser amounts of silt and clay-size material can be excavated, crushed, and sized into various products without drilling and blasting. Due to the large number of quarry and pit sites in Illinois, all information in the respective lists and maps must be considered subject to change and frequent revision. Some sites are active only sporadically or may be operated with portable equipment. Quarries and pits operated by county highway departments or township road commissions do not sell aggregate to the general public, but they may submit samples to IDOT laboratories for physical testing.

In the sand and gravel and stone sections, the remarks line contains information on various construction aggregate products that may be available (IDOT, Bulletin 23, 1986). In the sand and gravel section, the remarks line contains a brief description of these products. In the stone section, the remarks line contains a series of letters summarizing these and other products (see table 2, Limestone and Dolomite Products). The terms "gravel" and "coarse aggregate" refer to materials that are too large to pass through a No. 4 mesh sieve (4.75-mm or 0.187-inch square openings). The terms "sand" and "fine aggregate" refer to materials that are small enough to pass through a No. 4 mesh sieve, but are too large to pass through a No. 200 mesh sieve (0.075-mm or 0.0029-inch square openings). Various coarse (CA) and fine (FA) construction aggregate products are defined

according to their respective size graduations in "Standard Specifications for Road and Bridge Construction," by IDOT (Springfield, Illinois) adopted October 1, 1983. This book also defines four coarse and fine aggregate product groups according to their physical properties as follows:

- 1) Class A aggregate products are suitable for use in Portland cement concrete,
- 2) Class B aggregate products are suitable for use in Class I interstate highway quality bituminous concrete paving and base courses,
- 3) Class C aggregate products are suitable for use in lower quality bituminous concrete paving and base courses, and seal and cover, and
- 4) Class D aggregate products are suitable for use in water-bound macadam surface materials, base courses, shoulder fill and other low-grade uses.

---

**Table 1. Mineral Product Codes**

---

| <u>Product</u>                        | <u>Code number</u> |
|---------------------------------------|--------------------|
| Barite                                | 1                  |
| Bismuth (only plant now closed)       | 2                  |
| Cadmium                               | 3                  |
| Cement                                | 4                  |
| Clay Products (brick, tile and other) | 5                  |
| Clay Products (china, refract)        | 6                  |
| Clay Mines                            | 7                  |
| Coal                                  | 8                  |
| Coke                                  | 9                  |
| Columbium                             | 10                 |
| Fluorspar                             | 11                 |
| Fly Ash                               | 12                 |
| Glass Products                        | 13                 |
| Glass/Silica Sand Mines               | 14                 |
| Gypsum, calcined                      | 15                 |
| Iron Oxide Pigments                   | 16                 |
| Iron/Raw Steel                        | 17                 |
| Lead, Zinc, Silver                    | 18                 |
| Lime                                  | 19                 |
| Natural Gas Liquids                   | 20                 |
| Natural Gas, Synthetic                | 21                 |
| Peat                                  | 22                 |
| Perlite, expanded                     | 23                 |
| Petroleum Refineries                  | 24                 |
| Rare Earths                           | 25                 |
| Sand and Gravel                       | 26                 |
| Slag                                  | 27                 |
| Stone                                 | 28                 |
| Sulfur                                | 29                 |
| Tripoli, Ganister                     | 30                 |
| Vermiculite, expanded                 | 31                 |
| Zinc, primary                         | 32                 |
| Zinc, secondary                       | 33                 |

---

---

**Table 2. Limestone and Dolomite Products**

---

- A) Class A - Coarse-grain concrete aggregate
  - B) Class A - Fine-grain concrete aggregate
  - C) Class B - Coarse-grain bituminous aggregate
  - D) Class B - Fine-grain bituminous aggregate
  - E) Class B - Blend sand
  - F) Class B - Mineral fillers
  - G) Class C - Coarse and fine bituminous aggregate
  - H) Class C - Seal and cover
  - I) Class D - Base materials (type A)
  - J) Class D - Surface material (type B)
  - K) Agstone
  - L) Riprap
  - M) Railroad ballast
  - N) High-calcium limestone
  - O) Flagstone
  - P) Dolomitic lime (dead burned dolomite, high magnesium lime)
  - Q) Limestone and shale for cement
  - R) Lime
  - S) Chemical limestone
  - T) Flux stone
  - U) Filter stone
  - V) Industrial sand
  - W) Finely ground limestone or dolomite. Products may include agstone, stone sand, rock dust, feeding calcium, dairy barn powder, lawn and garden lime, limestock, and poultry grit.
-

## Stratigraphic Units Mined

Stratigraphic units are listed in order of increasing age except for units in the Quaternary System, where the vertical listing of stratigraphic names may be misleading because several of the named deposits were probably being deposited at the same time, but in different places. For more information, refer to Bulletin 95, "Handbook of Illinois Stratigraphy," Illinois State Geological Survey, 1975 and other ISGS publications.

## Quaternary System

- Pleistocene Series
  - Holocene Stage
    - Wisconsinan Stage
      - Cahokia Alluvium (maybe partly Holocene)
      - Parkland Sand (maybe partly Holocene)
      - Peoria Loess
      - Equality Formation
        - Carmi Member
        - Dalton Member
      - Henry Formation
        - Batavia Member
        - Mackinaw Member
        - Wasco Member
      - Wedron Formation
      - Roxana Silt
  - Illinoian Stage
    - Loveland Silt
    - Glasford Formation
    - Pearl Formation
      - Hagarstown Member
  - Pre-Illinoian
- Pliocene-Pleistocene
  - Mounds Gravel

## Tertiary System

- Porters Creek Formation

## Pennsylvanian System

- Mattoon Formation
  - Greenup Limestone Member
  - Omega Limestone Member
- Bond Formation
  - Millersville Limestone Member (central and southern Illinois),  
known as Livingston Limestone Member in eastern Illinois,  
known as La Salle Limestone Member in northern Illinois
  - Shoal Creek Limestone Member (equivalent to the Carthage Limestone)
- Modesto Formation
  - Lonsdale Limestone Member
  - Piasa Limestone Member
- Carbondale Formation
  - Danville (No. 7) Coal Member
  - Herrin (No. 6) Coal Member
  - Briar Hill (No. 5A) Coal Member
  - Springfield (No. 5) Coal Member
  - Colchester (No. 2) Coal Member
- Spoon Formation
  - Dekoven Coal Member
  - Davis Coal Member
  - Seville Limestone Member

## Mississippian System

Chesterian Series  
  Kincaid Limestone  
  Glen Dean Limestone  
  Haney Limestone  
    Marigold Oolite  
  Fraileys Formation  
  Downeys Bluff Limestone  
Valmeyeran Series  
  Ste. Genevieve Limestone  
  St. Louis Limestone  
  Salem Limestone  
    Rocher Member  
  Ullin Limestone  
    Harrodsburg Limestone Member  
  Warsaw Formation  
  Keokuk Limestone  
  Burlington Limestone  
Kinderhookian Series  
  Chouteau Limestone

## Devonian System

### Southern Illinois

Grand Tower Limestone  
Clear Creek Chert  
Grassy Knob Chert

### Northern Illinois

Cedar Valley Limestone  
Wapsipinicon Limestone

## Silurian System

### Northwestern Illinois

Racine Formation  
Marcus Formation

### Niagaran Series

### Northeastern Illinois

Racine Formation  
Sugar Run Formation  
Joliet Formation

### Alexandrian Series

Sweeney Formation  
Blanding Formation  
Tete des Morts Formation  
Mosalem Formation

Kankakee Formation  
Elwood Formation  
Wilhelmi Formation

## Ordovician System

Ft. Atkinson Limestone  
Galena Group  
  Wise Lake Formation  
  Dunleith Formation  
Platteville Group  
  Plattin Subgroup  
Ansell Group  
  St. Peter Sandstone  
Prairie du Chien Group  
  Shakopee Dolomite  
  Oneota Dolomite  
  Gunter Formation

## Cambrian System

Potosi Dolomite
